

# BE610 MAST COUPLER 2"

2" x 6" U bolt and three saddles. Used to couple two masts in parallel. Finish: Plated

We have photographed an arrangement with 2 x BE610 to give a 2" x 2" crossover 90 degree mounted bracket.

This arrangement can be used as a single 90 degree pole to pole clamp or for stacking and baying pole for an aerial frame etc.
